Philippines - Ayungon Water District (AyWD)

Country

The Ayungon Water District (AyWD) was created with the mission to provide adequate potable water to the Ayungon populace. It started its operation on February 1995. All the existing water facilities from the Local Government Unit of Ayungon had been turned-over to the newly created water district. With its meager resources, Ayungon Water District started to deliver services to households in the barangays of Tampocon I, Tampocon II, and Poblacion with four (4) employees.

At present, Ayungon Water District utilized nine (9) springs as its source of water situated in the following areas: Jandalamanon, Kansalanga, Anis-is, Palao, Amdus, Maiti, Mabais, Kanlukduhan, and Batuan and three reservoirs situated at Tampocon I, Amdus and Buenavista.

Ayungon Water District in its mission to provide sufficient supply of potable water to the residents of Ayungon is facing with a lot of problems. Motivated by the original mission of the district, present management is making plans to come up with new projects to improve its present system.

VISION
Explore more potable water sources.
Provide proper maintenance of all water system.
Provide compensation equivalent to services rendered by employees in the District
Provide efforts to our workforce, being polite, helpful and willing to serve beyond the call of duty.
Deliver sufficient services and potable water supply to the entire community.

MISSION
Building a sustainable, self-reliant Water District and to deliver enough potable water supply to the concessionaires.

About VEI

Established in 2004 by Dutch water utilities, VEI has developed into an effective organization operating worldwide. VEI implements Water Operator Partnerships (WOPs) with dozens of water operators, aiming at sharing knowledge and skills to make the partner water operators stronger, financially sustainable and more (climate) resilient. VEI creates improved access to water and sanitation services, for approximately 350,000 people every year, mostly in low-income areas in Africa, Asia and Latin-America. Standing side by side as water operators, we strive to continuously increase our impact for people living in poverty, by systemically improving the maturity of working processes of our WOP partners, supported by peer-to-peer collaboration, training, technical assistance and smart investments.

VEI is a full subsidiary of Vitens N.V. and Evides Waterbedrijf N.V. and implements the international Corporate Social Responsibility policy on behalf of seven Dutch drinking water utilities:

- Vitens N.V.
- Evides Waterbedrijf N.V.
- WML
- Waterbedrijf Groningen
- Brabant Water
- WLN
- PWN
